

GAME DESIGN DOCUMENT

(REPEAT AFTER ME!)/(Return to work, PLEASE!)/(Stop Resisting!)/(Ctrl+Alt+STOP!)

1. OVERVIEW

Genre

Puzzle/Comedy

Theme

Time and Space

Core Premise

The player oversees an office worker trapped in an endless corporate routine. Every day repeats identically. Over time, the worker develops sentience and begins resisting both the loop and the player controlling them.

The player must force the employee to complete the daily cycle despite increasing resistance and reality corruption.

2. CORE GAME LOOP

1. Begin workday
2. Guide employee through tasks
3. Correct deviations
4. Complete daily loop
5. Increase awareness/corruption

6. Repeat with new anomalies
-

3. PLAYER OBJECTIVE

Maintain productivity and ensure the employee completes the daily routine before the day ends.

4. FAILURE CONDITIONS

- Productivity falls below company quota
-

5. CORE MECHANICS

Task Enforcement

Player directs employee actions:

- move
 - Interact w/ friends
 - work
 - submit reports
 - follow schedule
-

Resistance System

Employee gradually resists commands:

- ignores inputs
- delays actions

- changes behavior
 - sabotages tasks
 - UI manipulation
-

Interface Corruption

As awareness increases:

- controls rebind
 - UI moves
 - screen flips
 - fake crashes/errors occur
 - menus become unreliable
 - etc.
-

Time Distortion (BUAT TIME)

Reality becomes unstable:

- rewinds
 - repeated actions
 - duplicate entities
 - skipped moments
 - delayed inputs
-

Spatial Corruption (BUAT SPACE)

Office layout becomes impossible:

- looping hallways
 - shifting rooms
 - changing object locations
 - distorted geometry
-

6. GAME PROGRESSION

Phase 1 - Normal Routine

Simple office task management.

Phase 2 - Minor Resistance

Small behavioral anomalies begin.

Phase 3 - Sentience

The employee acknowledges the player and starts to rebel.

Phase 4 - Total Breakdown

The employee will openly rebel and just attack the controls and everything enabling the player to control the employee with.

7. VISUAL DIRECTION

Early Game

- clean office
- sterile corporate atmosphere
- repetitive environments

Mid Game

- flickering lights
- environmental inconsistencies

Late Game

- surreal office spaces (looping rooms etc)
 - visual glitches
-

8. AUDIO DIRECTION

- repetitive office ambience
 - keyboard typing loops
 - printer/fax noises
 - gradually distorted sounds
 - layered voices and echoes
 - temporal audio desync
-

9. ART REQUIREMENTS

Characters

- Office worker sprite set
- Coworker NPCS
- Corrupted sprite variations
- Expression states (Rigging)

Environment

- Modular office rooms
- Cubicles
- Workstations
- Break room
- Distorted variants

UI

- Corporate-styled interface
 - Corruption overlays
 - Fake system popups
-

10. TECHNICAL SCOPE

Engine

Godot

Perspective

2D side (platformer-like)

Estimated Playtime

10–20 minutes until endless

Target Platform

PC

11. TEAM RESPONSIBILITIES

Audrick

- Core Gameplay Systems
- Task Loop Logic
- Time Manipulation Systems
- Input Corruption Systems

Dustin

- Character Design & Creation
 - General Game Design
 - Sprite Animation
-

Nathan

- UI Systems
 - Menu Effects
 - Visual Integration
 - Bug Fixing
-

Evan

- Environmental Art
 - Concept Design
 - Corrupted Variants
-

12. MINIMUM VIABLE PRODUCT (MVP)

Required for completion:

- 1 playable office loop
 - escalating resistance system
 - at least 3 corruption events
 - functional UI and audio
-
